*Special Thanks to John Hickey, Trudi Wright, Chris Kutz and Justin Peacock, who assisted with supporting, funding or building the studio. Thanks also to the performance and composition teachers here at Regis who support and inspire our students to reach on these recordings! This group of students was fairly inexperienced in recording arts, which makes it all the more remarkable just how much each one of them summoned up — in honesty, artistry and work ethic — to bring these polished songs that mean so much to them into the world in a single semester. They also rocked our concert of them. It’s my honor to be their teacher and to be associated with these punks’ work.*
